

Marielle Côrtes

Tech Lead - Data & AI Platforms | Engineering Intelligence | GenAI Analytics

📍 Florianópolis, Brazil (Remote)

✉ marielle-cortes@hotmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Tech Lead in Data & AI Engineering with experience building AI-driven platforms and large-scale analytics products. Currently leading enterprise initiatives focused on AI adoption measurement, engineering intelligence, and analytics systems for evaluating the impact of AI across the Software Development Lifecycle (SDLC).

Experienced in designing scalable data ecosystems, AI analytics frameworks, and platform architectures that enable data-driven decision making. Strong track record of translating complex engineering challenges into measurable business outcomes through AI systems, experimentation frameworks, and analytical products.

SELECTED IMPACT

- Built engineering intelligence datasets integrating telemetry from AI agents, development platforms, and SDLC systems for large-scale productivity analysis.
- Designed analytics frameworks identifying ~50% productivity improvements among 30K+ collaborators using AI Coding Tools.
- Built engineering intelligence systems aggregating activity logs across 18+ engineering tools to identify productivity patterns and developer behavioral clusters.
- Architected scalable feature store platforms supporting ML experimentation and 1.7K+ production-grade metrics.
- Led AI analytics initiatives supporting executive and Senior VP decision-making on AI investments and engineering productivity.

EXPERIENCE

Mercado Libre | Largest e-commerce and fintech ecosystem in Latin America

Tech Lead — Data & AI Engineering Aug 2025 – Present

Leading enterprise AI analytics and engineering intelligence initiatives focused on AI adoption measurement and productivity evaluation across the SDLC.

- Lead GenAI productivity and AI analytics initiatives across the engineering organization.
- Own cross-functional AI telemetry and analytics strategy involving multiple AI coding providers and internal engineering platforms.
- Drive architecture decisions for scalable analytical systems supporting engineering intelligence and AI investment assessment.
- Partner with engineering leadership and executive stakeholders to define AI adoption measurement frameworks and productivity KPIs.
- Coordinate analytical initiatives spanning telemetry ingestion, data modeling, experimentation, and executive reporting.

Sr. Data & Analytics Engineer Jul 2022 – Aug 2025

Designed enterprise-scale data products supporting Observability, Governance, and Data Mesh initiatives.

- Led Data Mesh adoption and stronger data ownership practices across distributed teams.
 - Built AI experimentation and analytics frameworks to measure the impact of Generative AI solutions.
 - Designed ML systems, scalable feature store architectures, and analytical platforms supporting internal products.
 - Developed data governance models and analytical initiatives improving operational visibility and executive decision-making.
-

NTT Data — Client: Itaú Unibanco | Latin America's largest private bank

Data Engineer Apr 2021 – Jul 2022

Designed and implemented cloud-native data solutions supporting regulatory and business requirements

- Translated complex Brazilian Central Bank requirements into production-grade systems.
 - Built cloud-native ETL pipelines and Infrastructure-as-Code solutions using AWS services including Lambda and Glue.
 - Designed a dynamic rule-based architecture capable of adapting to frequent business rule changes without modifying core logic.
-

TECHNICAL SKILLS

Languages: Python, SQL

AI Systems: AI Agents, MCP, RAG, LangChain, OpenAI APIs, Claude APIs

Data Engineering: BigQuery, PySpark, ETL/ELT, Data Modeling, Feature Stores, Data Mesh

Cloud & Platform: AWS, GCP, Docker, Kubernetes, Jenkins

Observability: Datadog, Grafana, Kibana, Monte Carlo

Analytics: Tableau, Power BI, Looker

EDUCATION

Postgraduate Certificate - Data Science, BI, Big Data & Analytics

Uniderp University, Brazil

Bachelor's Degree - Civil Engineering

ESAMC University, Brazil

LANGUAGES

Portuguese — *Native*
